

RETAIL EXECUTIVE DASHBOARD

Power BI Dashboard Report

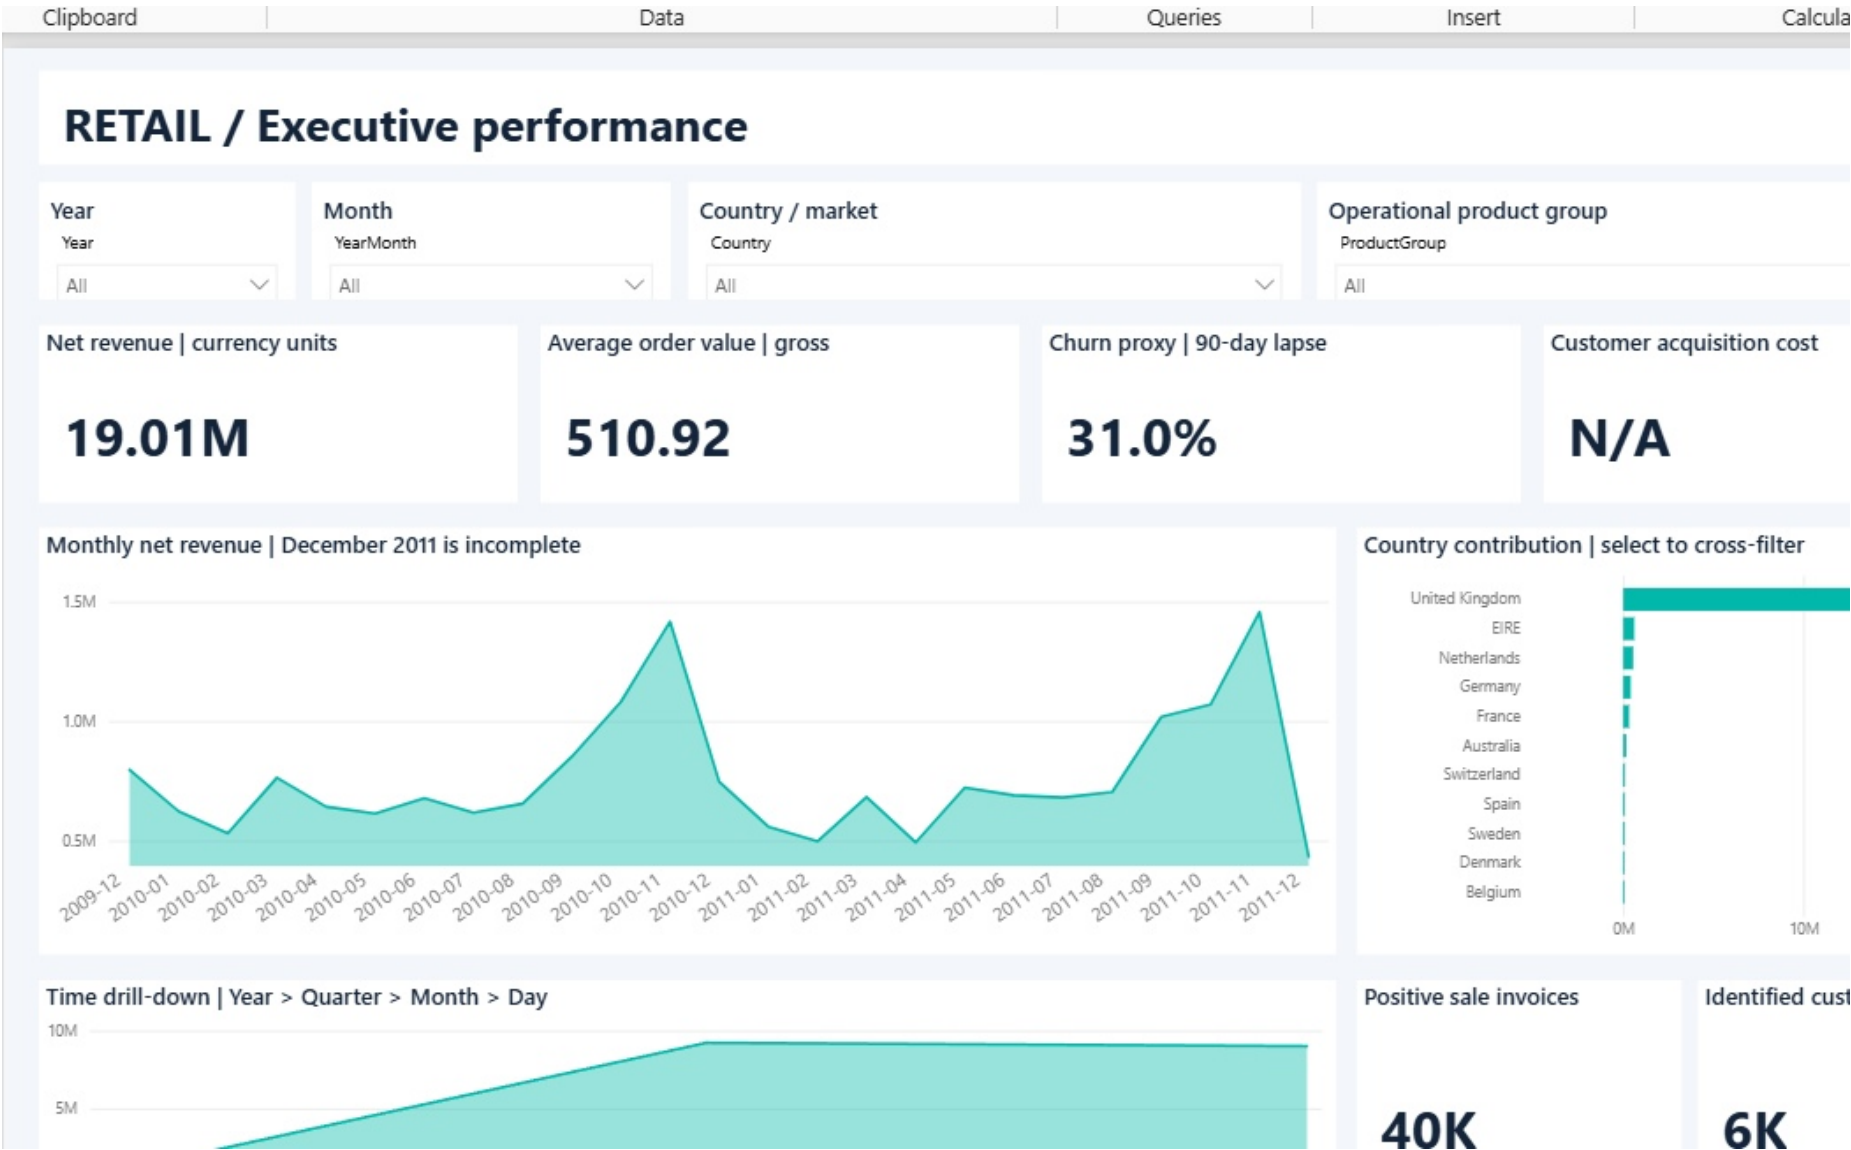

This report contains the four dashboard pages from the Power BI project: Executive Overview, Customers & Retention, Geographic Performance, and Product & Time Explorer.

Dashboard highlights: revenue performance, customer activity and retention, geographic performance, product/category performance, returns, orders, and time trends.

Updated version: Geographic Performance includes the working country map.

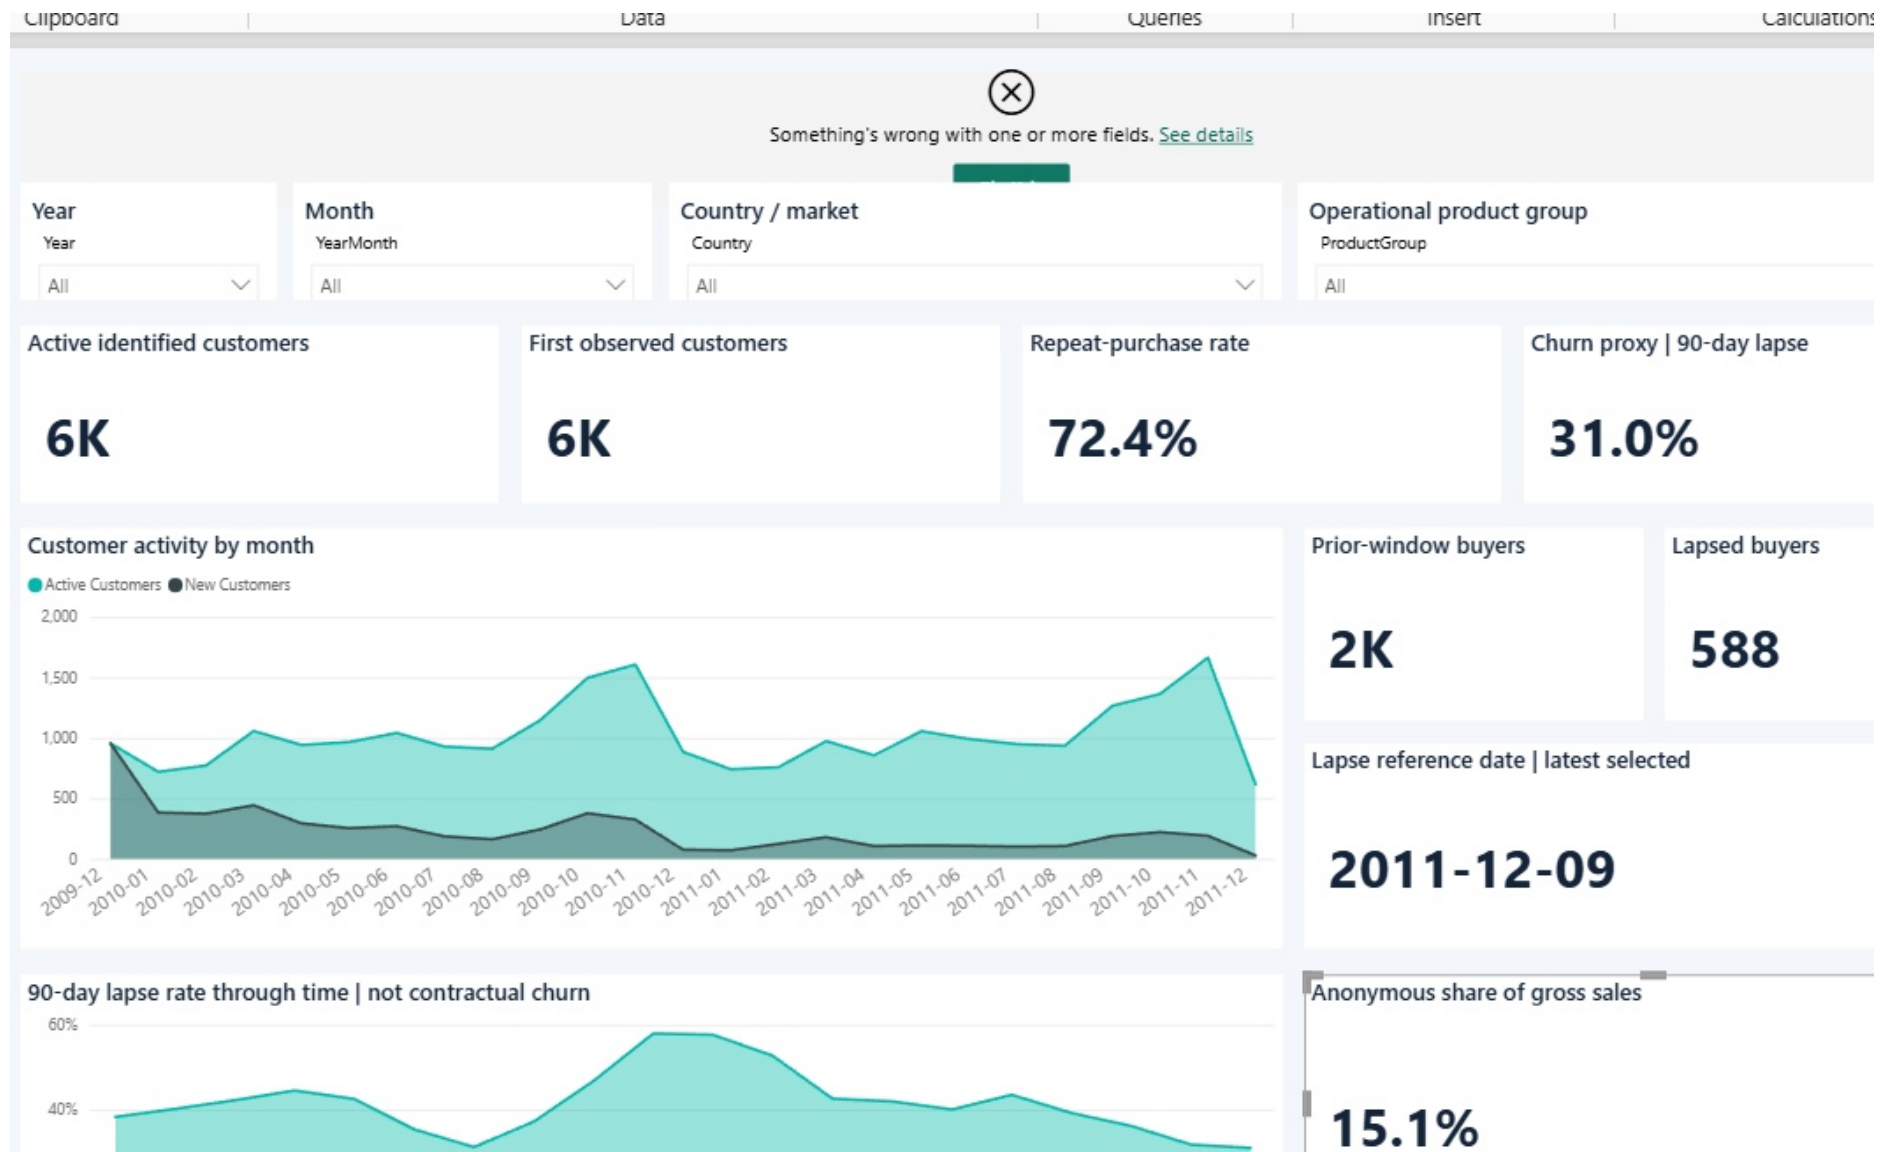

01 Executive Overview

Executive view of net revenue, average order value, 90-day lapse proxy, CAC availability, monthly revenue trend, country contribution, positive invoices, and identified customers.

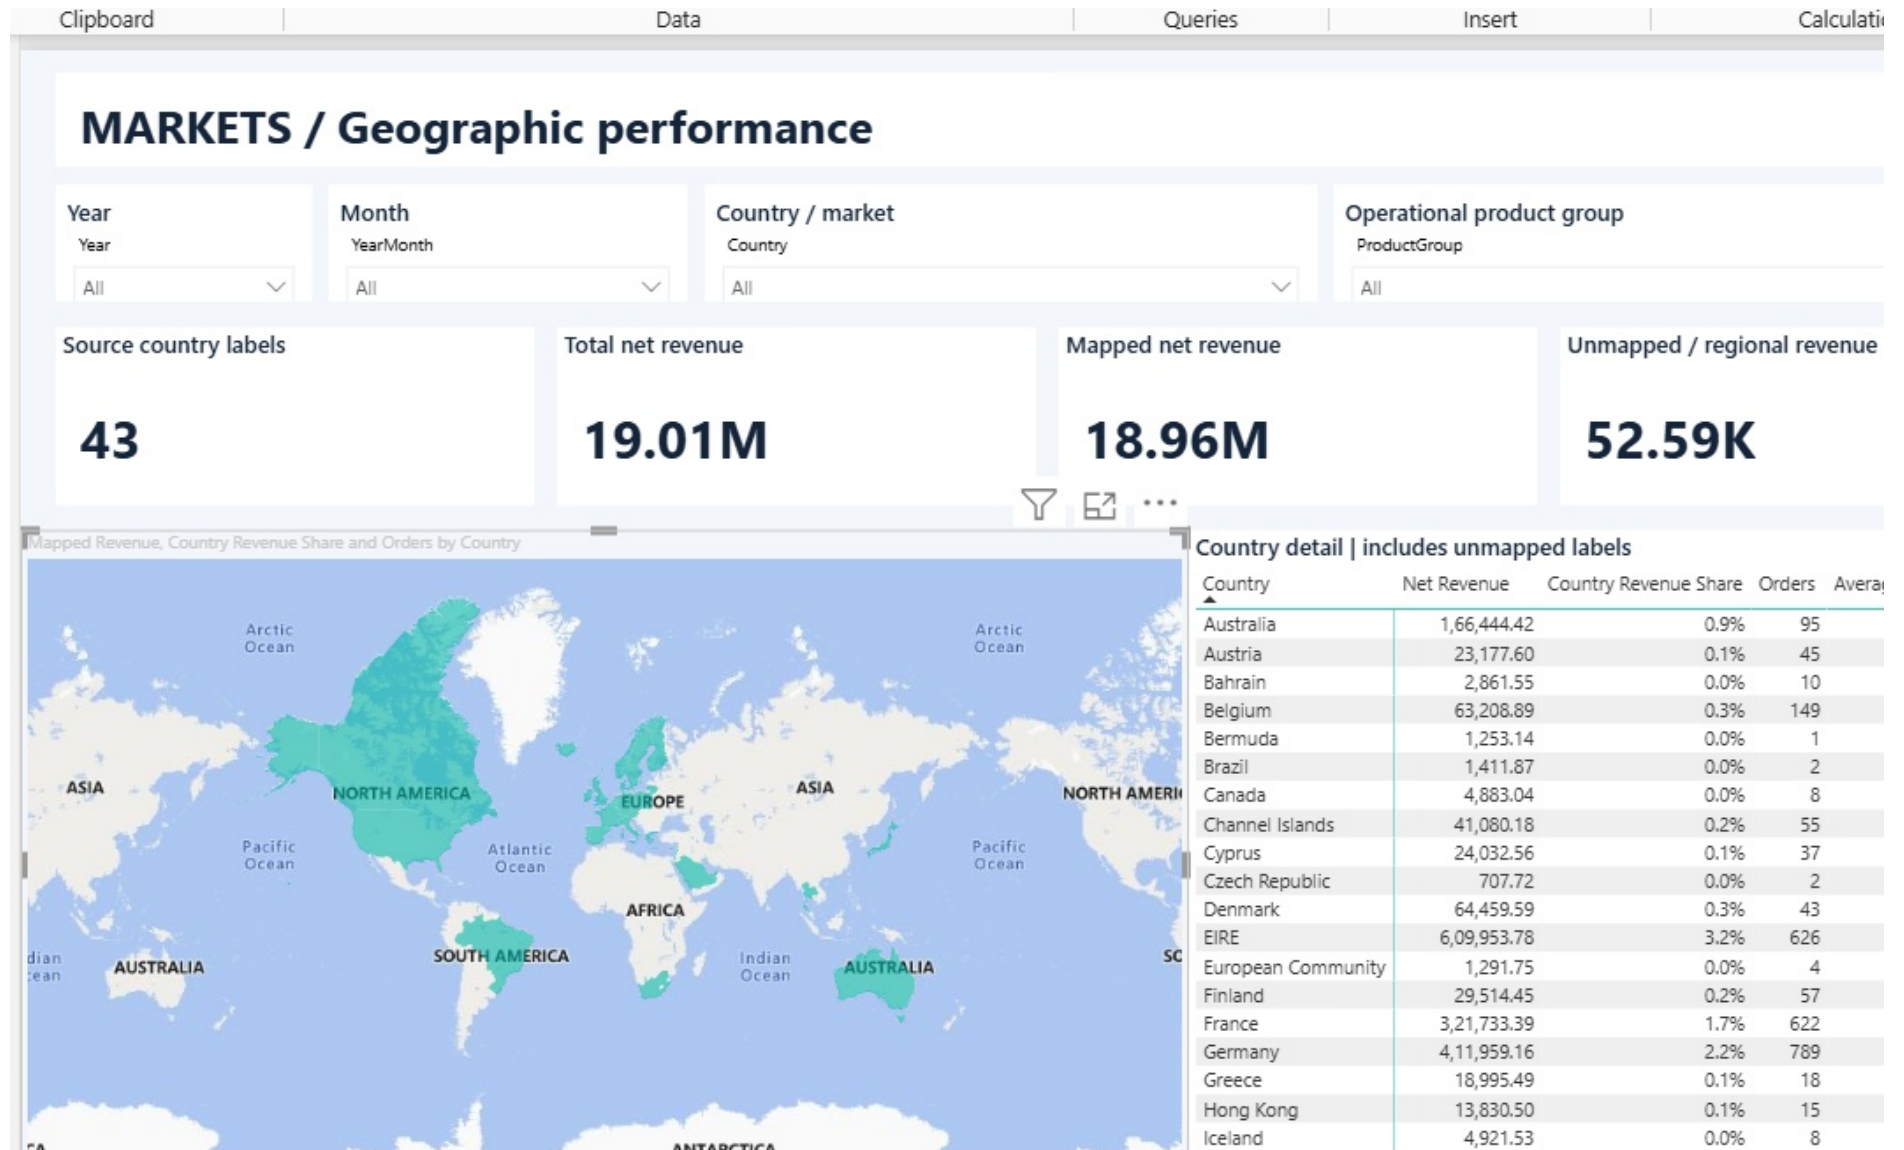

02 Customers & Retention

Customer view covering active and first-observed customers, repeat-purchase rate, 90-day lapse proxy, prior-window buyers, lapsed buyers, reference date, and anonymous sales share.

03 Geographic Performance

Geographic view showing source country coverage, total net revenue, mapped revenue, unmapped/regional revenue, the country map, and country-level detail. The map uses the configured Mapped Revenue > 0 filter.

04 Product & Time Explorer

Product and time view showing gross positive sales, returns/credits, monetary return rate, average order value, product-group drill-down, time trend, and product hierarchy details.
